EDUCATION

D.J. Sanghvi College of Engineering

B.Tech in Computer Science and Engineering (Data Science) – CGPA: 9.0/10.0

Mumbai, India

2023 – 2027

PROFESSIONAL EXPERIENCE

AI Intern

June 2025 – September 2025

Terrabyte Group | terrabyte.com

Remote

- Developed end-to-end **ETL pipelines** using **Python** and **AWS S3** to process and transform large-scale security log datasets, reducing preprocessing effort by **30%**
- Built automated data processing workflows for structured and unstructured datasets, improving data quality, monitoring, and operational reliability for downstream analytics
- Designed interactive **analytics dashboards** and reporting workflows for real-time security event analysis, reducing manual investigation effort by **40%**
- Collaborated with security and engineering teams to streamline data extraction, transformation, validation, and reporting processes across multiple systems
- Technical Skills: Python, SQL, AWS S3, ETL Pipelines, Data Processing, Data Visualization, Dashboarding, Monitoring & Logging*

PROJECTS

PharmaIQ – Pharmaceutical Intelligence Platform | *GitHub Repo*

02/2026

- Architected cloud-based pharmaceutical intelligence platform integrating FDA and clinical trial datasets with scalable analytical and data retrieval workflows
- Built end-to-end **ETL pipelines** using **Python** and **AWS S3** to ingest, clean, transform, and organize large structured and unstructured healthcare datasets
- Developed hybrid **RAG + SQL retrieval engine** enabling simultaneous structured database querying and contextual document search across cloud-hosted datasets, improving analytical accessibility and information discovery
- Tech Stack: Python, SQL, AWS S3, ETL Pipelines, RAG, BM25, Vector Search, Dashboarding, Data Processing, Retrieval Systems*

Floatchat – Intelligent Ocean Data Assistant | *GitHub Repo* | *Live Demo* 09/2025 | Ministry of Fisheries, India

- Designed cloud-based analytical platform for querying and exploring large-scale ARGO oceanographic datasets through intelligent data workflows
- Built end-to-end **ETL pipelines** converting NetCDF datasets into **PostgreSQL** and **Parquet** formats, optimizing storage efficiency and analytical query performance
- Developed hybrid **NL-to-SQL + semantic retrieval engine along with RAG** enabling natural language querying across structured databases and research documents, improving accessibility for non-technical researchers
- Designed agentic analytical workflows automating multi-step data exploration and reporting effectively reducing analytical turnaround time by approx. **50%**
- Tech Stack: Python, PostgreSQL, SQL, Parquet, ETL Pipelines, LangChain, FAISS, RAG, Semantic Search, Data Processing*

LEADERSHIP & AWARDS

- Vice-Chairperson, DJS-S4DS** – Led operations, outreach, and execution for a 200+ member national data science community; organized national-level hackathons and technical events.
- Coding Team Member, DJS Antariksh** – Contributed to rover development and OpenCV-based autonomous navigation systems using fine-tuned YOLOv8 models; achieved **2nd Runner-Up Internationally at IRC**.
- Winner, IIT BHU Impact Metrics Datathon 2025** – Secured 1st place among 650+ participants nationwide at IIT BHU, Varanasi - 2025 edition.
- Best Student Chapter 2026** – Awarded nationally by the Society for Data Science (S4DS) for outstanding leadership and community impact in the domain of Data Science.
- TIAA Hack Finalist – Top 6** – National finalist in the TIAA BRG Hackathon 2026 among 500+ participating teams.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Data Engineering & Analytics: ETL Pipelines, PostgreSQL, MySQL, SQLite, RDBMS Design, SQL Query Optimization, Data Modeling, Relational Data Architecture, AWS S3, Parquet, Snowflake

Visualization & Reporting: Power BI, Tableau, Dashboard Development, KPI Design, Data Analysis, Excel (PivotTables, VLOOKUP, INDEX/MATCH)

ML & Intelligent Systems: PyTorch, TensorFlow, Scikit-learn, RAG Pipelines, NL-to-SQL, LangChain, FAISS, Semantic Search, PySpark

Cloud & Backend Systems: AWS S3, REST APIs, Data Pipelines, Logging & Monitoring, Error Handling, System Design
